

BIG TAX BITE . . . Gordon Hough (right), vice president and general manager of Pacific Telephone Co., goes over a check for \$38,516,075.00 with James O'Connell, assistant treasurer of the company. The check, made payable to the County of Los Angeles, represents taxes on property owned by the firm for 1964-65.

Rehabilitation Farm for County's Drunks Urged

Emphasizing the need to rehabilitate drunks rather than just "dry them out," Supervisor Kenneth Hahn has stepped up efforts toward a work-training program for arrested alcoholics in Los Angeles County.

Hahn showed the Board of Supervisors further evidence of the savings possible to taxpayers by patterning a program similar to one operating in Contra Costa County.

In that county, inmates of the Rehabilitation Farm are assigned to work on farms and in similar employment receiving actual wages for their chores.

Two Units of Sea Barrier Now Complete

Two additional units of the west coast sea barrier project in Redondo and Hermosa Beach have been completed. These units will form a vital link in the county's program to hold back sea water from contaminating our valuable ground supplies of fresh water along the coastal plain," stated Supervisor Burton W. Chace.

The work was done under supervision of County Flood Control Chief M. E. Salsbury. When completed, the project will provide protection of fresh water supplies along an 11-mile stretch of coastline from Playa del Rey to Southwest areas.

Garden Checklist

1. This week is an important one in the care of gift plants. Give them plenty of water and an occasional airing outside the stuffiness of a heated room. Don't set out in frost however.
2. You get color in two seasons of the year from the flowering Japanese Cherries. In spring, their blooms burst forth in a spectacular salute to that season, while in fall, before they shed their leaves, they take on fall hues in vivid and lovely shades. Plant them now during the bare-root season.
3. A trellised row or two of black berries can provide a year-round treat for the home gardener. For the several weeks in summer when they are loaded with fruit, they provide fresh berries daily and in quantity. The excess can be harvested for jams and jellies or frozen for use when the vines are not producing. Ask your nurseryman about the best design for a black berry trellis.
4. Pots standing in dishes should be checked during wet weather to insure that no excess water is left to damage the plant.
5. The deciduous saucer magnolias are one of the most colorful contributors to the garden in early spring. Their cups of bloom—usually white with varying degrees of purple—are borne in such profusion as to cover the tree or shrub entirely before the foliage arrives. Slow growing, they will fit into pocket-size situations in practically any garden.
